DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-15 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

With regard to claims 1-5, the prior art discloses an active-matrix organic electroluminescent (OEL) display panel that comprises: a substrate; a transparent conductive layer on the substrate; a first passivation layer on the transparent on the transparent conductive layer, having a plurality of openings therein exposing portions of the transparent conductive layer, wherein each opening defines a pixel region; a plurality of thin film transistors arranged as a matrix; a plurality of organic function layers disposed on the transparent conductive layer in the openings; and a plurality of metal electrode layers disposed on the organic function layers and electrically connected to the corresponding thin film transistors. However, the prior art fails to disclose a plurality of thin film transistors disposed on the first passivation layer as claimed.

With regard to claims 6-10, the prior art discloses an active-matrix organic electroluminescent (OEL) display panel that comprises: a substrate; a metal layer on the substrate, having a plurality of openings therein exposing portions of the substrate; a first passivation layer on the metal layer, having a plurality of openings therein aligned with the openings in the metal layer; a plurality of thin film transistors arranged in a matrix; a plurality of transparent conductive layers disposed on the substrate in the openings; a plurality of organic function layers disposed on the transparent conductive layers in the openings; and a plurality of metal electrode layers disposed on the organic function layers and electrically connected to the

corresponding thin film transistors. However, the prior art fails to disclose a plurality of thin film transistors disposed on the first passivation layer as claimed.

With regard to claims 11-15, the prior art discloses an active-matrix electroluminescent (OEL) display panel that comprises: a substrate; a conductive layer disposed on the substrate; a first passivation layer disposed on a portion of the conductive layer, having a plurality of openings therein exposing portions of the substrate; a plurality of thin film transistors arranged as a matrix; a plurality of organic function layers disposed on the conductive layer in the openings; and a plurality of electrode layers disposed on the organic function layers and electrically connected to the corresponding thin film transistors. However, the prior art fails to disclose a plurality of thin film transistors disposed on the first passivation layer as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments filed 12 May 2006 with respect to claims 1-10 have been fully considered and are persuasive. The rejection of claims 1-10 under 35 U.S.C. 102(e) as being anticipated by Parker *et al.* (U. S. Patent No. 6,771,328 B2) has been withdrawn.

The examiner agrees with the applicant that Parker *et al*. failed to disclose a plurality of thin film transistors disposed on the first passivation layer.
